BELIEF IN THE LAW OF SMALL NUMBERS

AMOS TVERSKY AND DANIEL KAHNEMAN 1

Hebrew University of Jerusalem

The required estimate can be interpreted in several ways. One possible approach is to follow common research practice, where a value obtained in one study is taken to define a plausible alternative to the null hypothesis. The probability requested in the question can then be interpreted as the power of the second test (i.e., the probability of obtaining a significant result in the second sample) against the alternative hypothesis defined by the result of the first sample. In the special case of a test of a mean with known variance, one would compute the power of the test against the hypothesis that the population mean equals the mean of the first sample. Since the size of the second sample is half that of the first, the computed probability of obtaining $z \geq 1.645$ is only .473. A theoretically more justifiable approach is to interpret the requested probability within a Bayesian framework and compute it relative to some appropriately selected prior distribution. Assuming a uniform prior, the desired posterior probability is .478. Clearly, if the prior distribution favors the null hypothesis, as is often the case, the posterior probability will be even smaller.

麒體 Left News Service is a non-profit project of members of Siah (Israel New Left) in Jerusalem. Our purpose is to provide news originating here in Israel which is either ignored, buried or minimized by official and non-official media of the Israeli Establishment and to constitute a counter source of reliable information on the activities and thinking of left-opposition and peace forces in Israel.

Subscriptions: U.S. and Canada, $15.00 for 6 months; $8.00 for 3 months. Europe, $13.00 for 6 months; $7.00 for 3 months. All subscriptions for full 3 month or 6 month series.

Back issues by special request. All subscription rates include AIRMAIL postage. Checks are to be made out to ISRALEFT NEWS SERVICE.

Student rate: 30% reduction.
The Eugene Commission on the Rights of Women has been established to help you
- protect your own rights
- work effectively for the rights of women

This leaflet describes what the Women’s Commission can do for you and how you can help. Please read it. Then let us know your concerns and your interests.

It is also against the law for anyone to retaliate against you for defending your rights. These forms of discrimination also are illegal when based on color, race, religion, national origin, physical or mental handicap or marital status.
Giving Advice

Decision Theory Perspectives on Sexual Assault

Baruch Fischhoff
Department of Social and Decision Sciences,
Department of Engineering and Public Policy,
Carnegie Mellon University

What entitles us to give general advice? This general question is explored here in the specific context of providing responsible advice to women on how to make decisions about possible ways of reducing their risk of sexual assault. An approach is advanced that is a combination of decision analysis, used to provide a formal characterization of decision situations, and behavioral decision theory, used to provide a descriptive characterization of how people perceive those situations. The approach is illustrated with a set of studies using three diverse groups of women; a group of men, paralleling one of the groups of women; and a national sample of sexual assault experts. The approach is evaluated in terms of its feasibility, its strengths and weaknesses relative to alternative approaches, and its implicit position on broader political and philosophical issues.
